

AUSTRIA IN THE WORLD AND IN THE EU

(2015, source: FAO and Eurostat)

There is no marine fishing activity in Austria. The country is ranked 22nd in the EU for aquaculture products.

(1000 tonnes)	World	EU-28	Austria	% World	% EU-28
Catches	104.635	5.144	0	0,000%	0,00%
Aquaculture	106.094	1.307	3	0,003%	0,27%
Total	211.511	6.451	3	0,002%	0,05%

AQUACULTURE

Aquaculture refers to the farming of aquatic (freshwater or saltwater) organisms, such as fish, molluscs, crustaceans and aquatic plants. Aquaculture data are reported in live weight equivalent and value.

With no direct access to the sea, aquaculture activity in Austria is limited to freshwater farming. The main species are trout and carp. Trout is produced in raceways, following a flow-through system. Carps are produced in natural ponds (about 2.700 ha ponds, 550 ha of which are devoted to organic fish farming) (source: Aquaculture 2020 - Austrian strategy to increase the national fish production).

Most commercial species farmed and % of total (2015, KEUR and tonnes)

Species	Value (KEUR)	% of total	Volume (tonnes)	% of total
TROUT	12.120	62%	1.958	56%
OTHER SALMONIDS	3.502	18%	658	19%
CARP	2.358	12%	460	13%
OTHER FRESHWATER FISH	1.288	7%	398	11%
SALMON	238	1%	15	0%
PIKE	64	0%	5	0%

WHOLESALE (source: EUMOFA)

The wholesale market in Vienna-Inzersdorf is mainly devoted to fruit and vegetables, flowers and meat, but also hosts fish wholesalers.

About 20 fish wholesale companies are active in Austria.

PROCESSING (source: Eurostat-SBS)

According to the operational programme of Austria (EMFF framework), the Austrian fish processing sector produces high-quality products that account for an annual turnover of EUR 58 million and has 282 FTE employees.

SUPPLY BALANCE (source: EUMOFA)

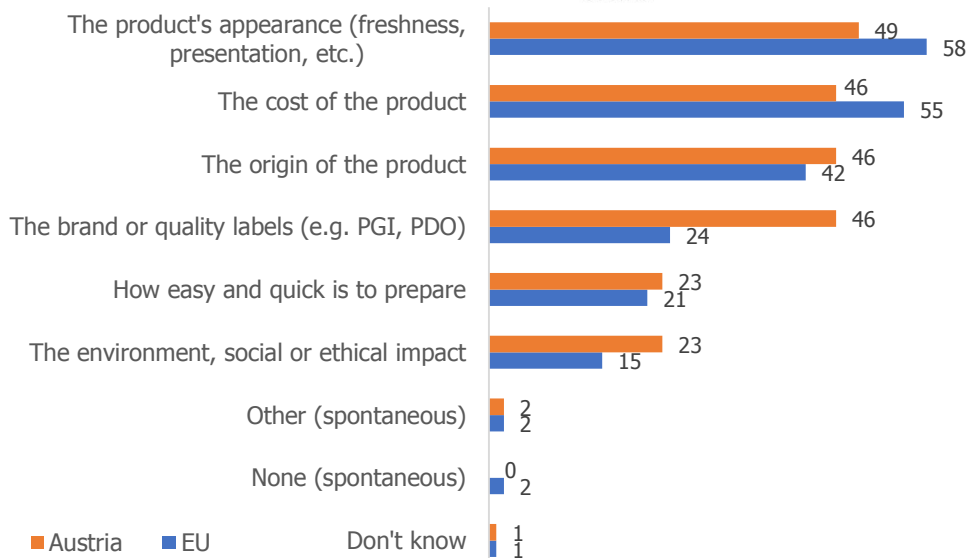

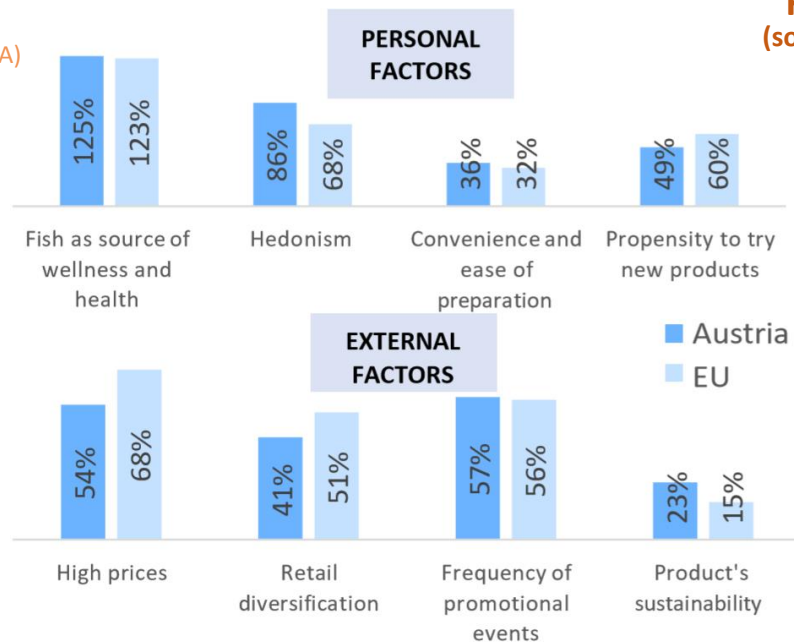

CONSUMPTION

Compared to other European countries, per capita consumption of fishery and aquaculture products is quite low and amounted to **13,4 kg/per capita in 2015**, a very slight increase (+0,4%) compared to the previous year. The main consumed species were **freshwater fish**. From a socio-demographic point of view, regular fish consumers belong mainly to the age group over 55 years (65%). Young people tend to consume fish less frequently (44%). This age group has the lowest number of regular consumers in Austria (44%) and across the EU (67%) (source: "EU consumer habits regarding fishery and aquaculture products").
