## LANDINGS

#### Source: EUMOFA, based on Eurostat data.

Landings comprise the initial unloading of any fisheries products from on board a fishing vessel in a given Member State. They include aquatic plants and species not destined for human consumption. Landings are recorded in net weight and value, and concern landings made by vessels from EU Member States, Iceland, Norway and the UK.

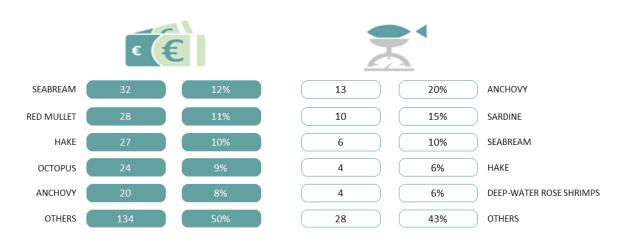

According to Eurostat, all landings in Greece in 2022 were fresh whole/gutted products destined for human consumption.

There are 363 fishing ports registered in the country (source: EU Master Data Register, 31 October 2024).

Total landings. Values are deflated by using the GDP deflator (base=2015)

Greece

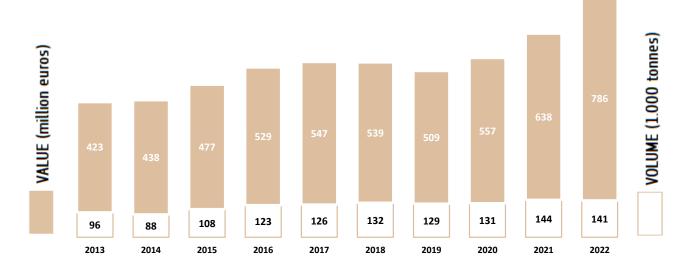

AQUACULTURE

ource: EUMOFA, based on Eurostat and FAO data

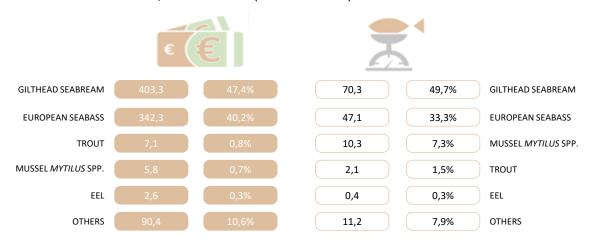

Aquaculture consists in the farming of aquatic (freshwater or saltwater) organisms, such as fish, molluscs, crustaceans and aquatic plants. Aquaculture data are reported in live weight equivalent and value.

According to Eurostat, in 2022, 98% of Greek production occurred in sea and brackish waters (almost entirely in marine waters) and the rest in freshwater. The main production method used were cages, followed by other methods for which no detail is available.

**Total production.** Values are deflated by using the GDP deflator (base=2015)

# **Main commercial species farmed and % of total** 2022, million euros (nominal value) and 1.000 tonnes

# **PRODUCER ORGANISATIONS**

Data as of 11-12-2024, source: DG MARE, link

In Greece, **2 producer organisations (POs)** are formally recognized, both operating in aquaculture. Their role is to contribute to the achievement of the objectives of the Common Fisheries Policy (CFP) and of the Common organisation of the markets (CMO) through the collective management of their members' activities.

# **FIRST SALES**

#### 2024, source: EUMOFA

First sales concern the fish that is sold or registered at an auction center or to registered buyers or to producer organizations (PO). First sales may differ from landings since the former do not cover fish that is landed by vessels owned by processing companies or direct sales to processors.

In 2024, total first sales in Greece amounted to 28.931 tonnes and 89 million euros. Five main commercial species covered more than 58% of total first-sale volume and value.

Top-5 main commercial species	Volume (tonnes)	Value (million euros)
Anchovy	9.915	15,09
Sardine	6.566	14,00
Hake	1.047	10,16
Other marine fish	887	6,68
Red mullet	581	6,38

# WHOLESALE

Wholesale is an intermediary stage in the distribution channel that buys in bulk and sells to resellers (e.g. retailers) rather than to consumers.

In Greece, the wholesale stage is mainly recorded in auction markets (source: Directorate for Fisheries Policy & Development of Fisheries Products). In 2022, sales at the Piraeus market totalled 10.410 tonnes and 29 million euros.

## PROCESSING

According to Eurostat-SBS, 1.516 persons were employed in the Greek fish processing industry in 2022. The sector recorded a value added of 42,8 million euros, covering 1,3% of the value added of total manufacture of food products.

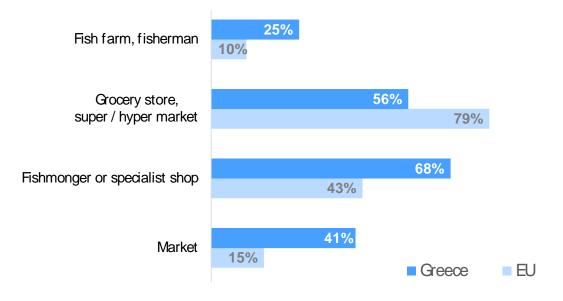

In 2023, the main products sold were "Molluscs (scallops, mussels, cuttle fish, squid and octopus), frozen, dried, salted or in brine" and "Crustaceans, molluscs and other aquatic invertebrates and seaweed, otherwise prepared or preserved" (source: Eurostat-PRODCOM).

## **CONSUMPTION**

In 2022, apparent consumption was estimated at 19,82 kg per capita, a 1% increase compared with 2021. The most consumed species are squid, sardine, cod and anchovy (source: EUMOFA). Regular consumers, namely those who eat fishery and aquaculture products at least once a month, mainly belong to age groups 40-54 and over 55. Young people (15-24) are less inclined to consume fish in Greece, as well as at EU level. However, regular consumers in this category cover 70% of the total, which is higher than at EU level (67%, UK included). Greeks consume especially fresh products; loose fish is much more frequently consumed (92%) than at EU level (68%, UK included) (source: EUMOFA, "EU consumer habits regarding fishery and aquaculture products", 2017).

## THE COUNTRY IN EUMOFA

### LANDINGS

Volumes and values are collected from Eurostat – Fishery.

They are available on a yearly basis and accessible through simple and advanced tables, as well as through the bulk download facility.

**FIRST SALES** 

Volumes and values are collected on a monthly basis

from the Ministry of Rural Development & Food of

They are accessible through simple and advanced

tables, as well as through the bulk download facility.

Data at disaggregated level are also accessible,

through a dedicated advanced table and the bulk

Greece. Data cover all species sold in Greece.

download facility.

AQUACULTURE

Volumes and values are collected from Eurostat – Fishery and integrated with FAO data.

They are available on a yearly basis and accessible through simple and advanced tables, as well as through the bulk download facility.

#### WHOLESALE

Data are collected from the Ministry of Rural Development & Food of Greece and refer to sales in the port of Piraeus.

On a weekly basis, volumes and values of a selection of 17 main commercial species are collected.

On a monthly basis, volumes and values are collected and cover all species sold.

Both weekly and monthly data are accessible through simple and advanced tables, as well as through the bulk download facility.

#### PROCESSING

## **IMPORT - EXPORT**

Volumes and values are collected from Eurostat – COMEXT. Data concern trade flows of all fisheries and aquaculture products as recorded by national customs.

They are available on a monthly and yearly basis and accessible through simple and advanced tables, as well as through the bulk download facility. Data are collected from Eurostat – PRODCOM. They concern ex-farm quantities and values of fisheries and aquaculture products sold in the country after being transformed from raw material into final products.

They are available on a yearly basis and accessible through simple tables, as well as through the bulk download facility.

### **CONSUMPTION**

Retail prices from online shops are available, as collected via price-scraper.
